

# Unfold a Revolution!

EasyGrow by UniFold

**Finally!** An easy to erect, maintenance free, lifestyle greenhouse, affordable enough for the hobby gardener, and tough enough for the professional grower. Made from 4mm polycarbonate, EasyGrow greenhouses are tougher than framed kits, without the building code, tax assessment, and permit hassles that accompany constructing those structures.

**So get an EasyGrow... and get growing!**

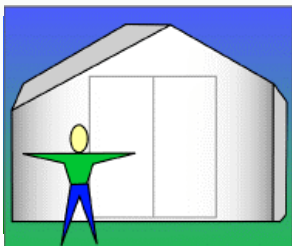

EasyGrow comes in **3** sizes:

**10' EasyGrow™** - Ideal for hobby gardeners looking to extend their growing season by starting earlier in the spring and finishing later in the fall. This size is big enough for any residential use, easy to set up, and affordable too. It takes just 30 minutes to construct.

**11' EasyGrow™** – The serious gardener and small commercial operator can really benefit from the spacious dimensions of this model. Generous headroom and high side -walls allow aisles wide enough to accommodate 'shoppers'.

**13' ProGrow™** – Commercial growing capacity at a price that's a fraction of the cost per square foot for post-framed greenhouses. ProGrow is the perfect solution to the problem of seasonal garden centers that need sound and secure greenhouse structures but only for a few months at a time.

# EasyGrow offers **6** important advantages:

**Time** — What do you like more, gardening or weekend long construction projects? With a 30 minute assembly time, EasyGrow gives you time to grow!

**It's Easy!** — Only EasyGrow uses the patented concertina folded frame structure. This 'opens' into the greenhouse of your dreams in about 30 seconds. You spend another 20 minutes or so fastening the end wall panels to complete your newest garden project.

**Crystal Prism Growing** — The folds have a valuable optical effect we call Crystal Prism Growing. The profile captures morning and evening light with a minimum of reflection, while providing maximum diffusion and reflection mid-day when the sun is at its peak.

**Interior Zones** — With optional GrowZone interior walls, multiple climates are... Easy!

**Affordability** — Compare cost per square foot installed, consider the hassles you'll avoid in construction, and there is no comparison. EasyGrow gives you the most... for the least.

**Mobility** — Go ahead and make the investment in a quality asset for your passion. You have nothing to lose when you know you can take it with you.
