

ShelteX™

The world's fastest and easiest complete structure. Period.

In seconds ShelteX forms a roof, sidewalls, floor and end walls into a full size structural building ready to protect people, equipment, or supplies. In the most extreme wind, rain, snow, and cold... get into the fold!

Remember 3 unbeatable features:

- 1. Fast:** 2 persons - 30 seconds. Believe It!
- 2. Easy:** No assembly = Nothing to get lost
- 3. Affordable:** A fraction of the cost of other super-fast structure systems

ShelteX™ is used by the world's most demanding emergency responders, hazardous materials response teams, and extreme event promoters. Medical, military, and disaster responders are supported worldwide by FernoMIR, our partners in turn-key Major Incident Response solutions. For expertise in providing complete solutions for the emergency responder, call or visit FernoMIR at 321-308-2910

Some Uses for ShelteX™:

Portable Showers
 EMS Responder Rehab
 Hazmat/Decontamination
 Modesty/Change Rooms
 Triage/Mortuary

Command Posts
 Security & Inspection
 Outdoor events
 Mobile Services
 Evacuation & Refuge

SARS

ShelteX™ was ideal for visitor screening and waiting during the SARS outbreak. Here, one of a number of hospitals near Toronto uses two structures for those duties. The March 2003 outbreak occurred during a winter storm. High winds and heavy snow were not enough to damage the ShelteX™ structures. However, the plywood and 2X4 fencing that ran between the structure and the hospital entrance shown here was literally blown away hours before this picture was taken.
